

Motion Data Acquisition & Preprocessing

Inputs:

OptiTrack CSV (raw marker positions)
30 Hz frame rate
3D reflective marker data

Output:

BVH file (human skeletal animation)

Motion Retargeting via GMR

Inputs:

BVH file (human skeleton)

Output:

PKL file (root pos, root quat, joint angles)

Frame Conversion & AMP Training

Inputs:

PKL file (GMR output)

Output:

Trained Parkour Policy (ONNX)
